Scoring

The score is the total number of simple forms correctly traced in Second and Third Sections combined. Omitted items are scored as incorrect. The items in the First Section are *not* included in the total score. Scorers should, however, scan this section before starting to score the booklet as a means of making sure that the subject has understood the test directions. Experience has indicated that college subjects rarely make errors in the First Section.

Some training and practice are required to score items. A scoring key is provided with the Simple Form traced over each Complex Figure. In order to receive credit for an item, *all* lines of the Simple Form must be traced (including the inner lines for the cube, Simple Form "E"). The Scorer must also be sure that no extra lines have been added by the subject and that all incorrect lines have been erased.

FIRST SECTION
